NEKYIA
Pathology Consulting

Pathology consulting for nonclinical studies

Independent expertise. Direct collaboration.

Nekyia is the independent practice of Brieuc Cossic, DVM, MS, Dipl. ACVP. I support pharmaceutical, biotechnology and CRO teams with tissue evaluation, interpretation and quantitative image analysis.

How I can support your study

Toxicologic pathology Microscopic evaluation, pathology reporting and independent peer review for GLP and non-GLP studies, with study-specific quality arrangements.

Investigative pathology Disease-model assessment, efficacy and mechanistic studies, endpoint selection and tissue-based interpretation.

Computational pathology Tissue annotation, histomorphometry, image-analysis evaluation and biological review of cell detections and segmentations.

Particular experience

Neuropathology and oligonucleotide safety, including ASO and siRNA programmes and central and peripheral nervous-system assessment. Broader industry experience includes oncology, immunology and neurodegenerative disease programmes.

Background

ACVP Diplomate with anatomic pathology residency training at Cornell University and industry experience at Idorsia and Roche. Experience with histopathology, IHC, ISH, multiplex and fluorescence methods, and quantitative tissue workflows.

Working together

Work directly with me for a full study, independent review or focused scientific question. I collaborate remotely with study teams and multiple CROs. Scope, material, deliverables and timelines are agreed for each assignment.
